

easytest Isolation Transformer

The easytest Isolation Transformer is Australian designed and manufactured.

Instructional videos on our website
www.easytest.com.au

Features:

Provides isolation for testing portable RCDs
Eliminates unwanted tripping of RCDs that are not being tested
Lightweight toroidal design
4KV isolation tested between windings
Surge protected
Safety M205 screw type fuse holder used

Safety:

Output is live when powered by the mains
Disconnect from the mains when replacing the fuse

Electrical Specifications:

Input supply = 240Vac 50Hz
Output power = 240Vac >100mA
4KV isolation tested for 1 minute
Overload protection fuse = 1amp
Voltage regulation < 1%

Dimensions:

Weight = 3.1Kg
Size = 160(L) x 105(W) x 55(D)mm

Accessories included:

Adhesive feet fitted to unit
Sturdy protective storage box
